## ***- District Striping - Crew Safety Review***

### **Crew Specific Safety Review**

Each crew member is to have a copy of the PK Safety & Health Hand book for today's District Striping Tool Talk discussion. In this Tool Talk we will review the PK Safety & Health Handbook and focus on specific provisions for Thermo Striping operations. This Tool Talk review is to also familiarize crew members about the project, roles and responsibilities. Identify tasks, evaluate risks, and address any questions. The PK Safety & Health Handbook is found on the PK Employee Homepage and printed copies are available at each division.

- **3.17 Transferring Thermoplastic Material (P.17)**

Follow the guidelines for the safe operation of thermo equipment and material transfer.

- **4.2 Material Safety Data Sheets (SDS)**

All employees are required to have the link to the PK SDS stored on their personal device for SDS access in an emergency. Save the following link as a favorite or your home screen for quick access:

- **The Safety Checklist** on pages 20— 21 and **Daily Vehicle Inspection Checklist** on page 22 is available for use with daily pre and post trip inspections.

- **Police Assistance For Freeway Striping Crews:**

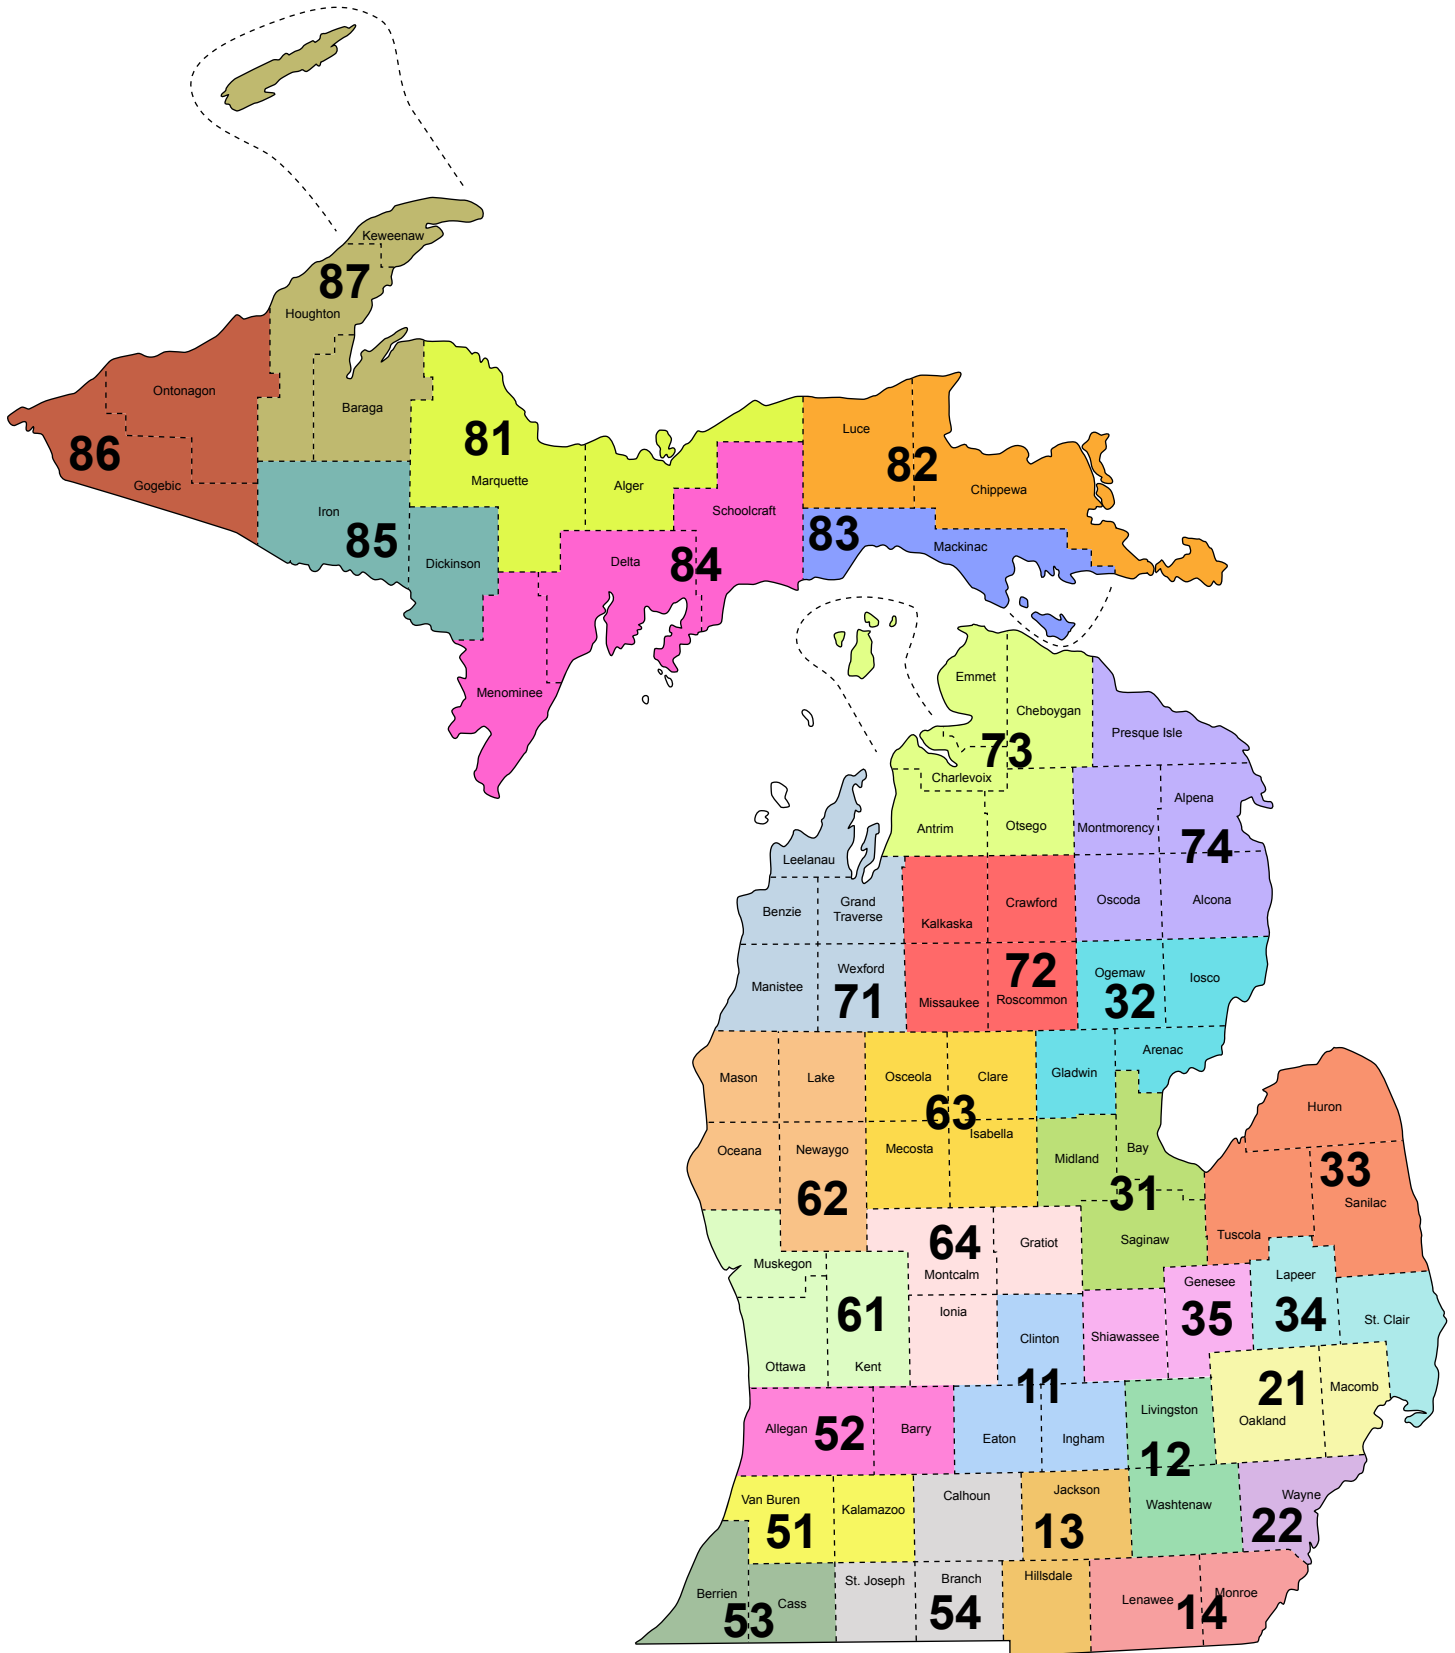

Contact the local MSP post as needed to request additional patrols . An MSP Post Directory is attached.

- **Foreman Work Reports**

Foreman's reports need to be completely filled out with more than just quantities and time. Fuel usage must be reported for every vehicle everyday along with any hotel or other expenses. Information provided on the daily reports is also used to track and find the cause of incidents and eliminate a recurrence.
